

TST brings you

TROUBLE-FREE SERVICES OF TECHNOLOGY

tsttechnology.in

ABOUT

TST Technology is a team of young, energetic, and enthusiastic members bringing to the table a whole new set of innovative and fresh ideas to solve industry challenges and difficulties.

Based on the foundation of excellence, commitment, and perfection, we provide businesses a chance to leverage the true power of technology.

Within the first 10 months of launching the company, TST completed 50+ projects, extended its team to 20+ developers, and worked with 20+ clients from 4 different countries.

We have worked with many startup companies and successfully built their software out of which some even got funding from [Angel Investors and VCs](#).

TST has experience in developing mobile applications, websites, and software for various sectors like [E-commerce](#), [FMCG](#), [Healthcare](#), [Finance](#), [Fitness and Sports](#), [Social Work](#), [Digital Media](#), and others.

We are highly customer-centric, which means any client business/organization is our prime focus, and we work to deliver them core satisfaction.

We provide our clients with

 Software Development

 App & Web Development

 Cloud services

 Metaverse

 Blockchain and NFT Development

 UI/UX Designing

 DevOps consultancy

 IT consulting services

Talking about the services allows us to mention only a compact list.

Our services go beyond this to provide you with full-time support and assistance so that you get a rich experience.

TEAM

PARTH MAKWANA

Founder and COO

Parth is the Founder and COO of IT company TST Technology, Co-founder of Bstop, Harvard Delegate, Storyteller, Content Creator, and a Speaker.

Nowadays, exploring Blockchain, NFT, Crypto, and Metaverse stuff has become a priority for him to keep up with the new world.

He has given 10+ talks in colleges and been a part of various podcasts. Interviewed 25+ people, who were either Founders or CEOs, and speakers from TEDx and Josh Talks and talked to several entrepreneurs, businessmen, & angel investors.

When he was in the first semester of engineering, he always thought about different kinds of Apps, Webs, and tools or software which can solve real-life problems.

And to fulfill his vision, he launched his IT company, TST Technology with his friends.

With the help of TST Technology, he wants to help businesses to develop their in-house technologies.

CLIENT TESTIMONIALS

**Akash**

Founder of Suryavanshi Ventures

Working with Parth was awesome, he has all the required skills and knowledge to help you with your project. He has good communication and organizational skills which helped us to complete the project faster. I will recommend Parth to anyone who is looking for technical help with their project.

**Abdullah Siddique**

Founder of Invex Wealth

TST Technology is the best company you can choose for your Technological needs. They are helping me develop my financial tech start up, what amazed me was how they were willing to get out of their comfort zone and understand complex problems and come up with solutions efficiently and in a timely manner. Would recommend them for any tech related development.

**Robert Lanigan**

Co-founder of Mash

Harshit did an excellent job implementing a core NFT feature of our mobile app Mash. It was a novel idea that required strong knowledge of Polygon, OpenSea and mobile app development. He communicated well throughout the project, was timely meeting deadlines, and overall responsive to our comments and needs. We remain impressed with his work, which has been seamless and scalable.

**Tyler McCullough**

CEO of Light bodies

Harshit is an incredible developer. He is very knowledgeable in JavaScript coding and blockchain development.

Throughout our time working together we ran into a plethora of issues and roadblocks that we had to work around. Harshit is amazing at troubleshooting and problem solving in areas where most would be completely stuck. A brilliant mind that can explain complex processes in terms that someone with very little development knowledge can understand.

Highly recommend Harshit and will be working with him and his team in the future!

CLIENT TESTIMONIALS

Linda N

CEO of SAYge Link

I wanted to thank you to daxesh for working so hard to get the work done. I know this was a big push, and recognize that you put in a TON of days to make it happen in the last couple of weeks, especially leading up to the meeting!

Meeting went really well, the client was very pleased. This partnership is pivotal to our path forward. THANK YOU Daxesh for all of your help, it's greatly appreciated.

Shubham Rawal

Founder and CEO of StockPe

Hiren & part handeled our execution at great pace and the quality of the final product is what impressed me. Being an outsourced consultant, they always worked like an internal team and also provided great feedback.

Tanujh Singh

Founder of Widur

It has been awesome to work with team TST. They're young professionals who really work hard to serve better results to their clients. They don't only develop robust softwares but also help in growing your business by suggesting awesome ideas.

I would recommend team TST to any startups or growing organisations who need technical support.

Yash Pumbadiya

CEO of Veggie 365

your team is your strength, without a team and management, one cannot create or achieve anything hiren is the real backbone who made our dreams into reality is he isn't only an excellent developer but has an excellent management skill finally here are we after so much hard work and efforts I am truly recommending him he is best at his work
